

MEDICATION ADMINISTRATION AWARENESS

This is to certify that

Martin Buckley

completed an eLearning course in the above subject

The key areas covered:

What a medicine is

Safe storage of medication

Common mistakes when administering medication and how to avoid them

Routes of administration and safe practice procedures

The importance of seeking help when questions or concerns arise

The various records relating to the process of ordering, receiving, administering and destroying medicines

Remember to discuss your key learning outcomes with your line manager and how you will apply this in practice within your work environment. You must be assessed as competent before administering medication without direct supervision.
